

AI OCR — DOCUMENT VALIDATION REPORT

Document: VG-CP2-PIP-DWG-0112 | Status: FAIL | Engine: VGL OCR

Phase 1: AI Metadata Extraction

PASS AI OCR Extraction	Extracted 6 of 14 fields (partial)
	document_number : VG-CP2-PIP-DWG-0112
	document_title : Piping Isometric - Scanned
	Drawing Area 400
	revision : A
	issue_date : 05 April 2026
	from_organisation : WOR - Worley
	project : Venture Global CP2 LNG - C2 EPC-BOP
	classification : NOT FOUND
	security_code : NOT FOUND
	issue_purpose : NOT FOUND
	discipline_code : NOT FOUND
	document_type : NOT FOUND
	prepared_by : NOT FOUND

Phase 2: Cross-Page Consistency Analysis

PASS Blank Page Detection	No blank pages found
FAIL Non-OCR Page Detection	Page 2-3
Page 2: IMAGE ONLY — scanned drawing with no searchable text layer.	
Page 3: IMAGE ONLY — scanned drawing with no searchable text layer.	
These pages contain embedded raster images but no OCR text.	
Action Required: Run OCR processing (e.g. Azure Document Intelligence) on scanned pages.	
PASS Draft Watermark Check	No draft watermarks found
PASS Markup Annotations Check	No markups detected
WARN Signature Block Present	No approval signatures found
WARN Revision History Present	No revision history section
FAIL Security Classification	
No security classification found in document.	
Expected: "Company Use", "Confidential", "Restricted", or "Public".	
Security classification is a mandatory field per VGL document control procedures.	

Phase 3: Loadsheets Cross-Validation

PASS Loadsheets: Document Number	Match: VG-CP2-PIP-DWG-0112
PASS Loadsheets: Document Title	Title matches loadsheet
PASS Loadsheets: Revision	Revision matches: A

Summary

Total Checks: 14 | Passed: 7 | Failed: 3 | Warnings: 4

VERDICT: REJECTED — Document contains non-OCR image pages and missing mandatory fields.
