REVISION HISTORY

[illegible]

1. SCOPE OF WORK

This drawing defines the mechanical equipment layout for Train 1 of the Engineering Project facility under Contract C2 EPC-BOP. All equipment shall be installed in accordance with project engineering documents and applicable codes and standards.

2. REFERENCES

All equipment installation shall comply with:

- ASME B31.3 — Process Piping
- API 610 — Centrifugal Pumps
- Project Specification VGL-MEC-SPE-001
- Vendor data books as supplied

3. ACCEPTANCE CRITERIA

Equipment alignment tolerances shall be per manufacturer recommendations. Foundation bolt torque values per project standard VGL-MEC-STD-003.

4. MATERIAL SPECIFICATION

All carbon steel components: ASTM A36 / A106 Grade B

Stainless steel: ASTM A312 TP316L

Bolting: ASTM A193 B7 / A194 2H
